

B-1 can't I John McFall

People coming for yrs to see trace, many on Sunday.  
Guess 1000 cars in this area yesterday (Sunday)

Short interview Mrs. Figgie Moss (at State Park)

Track in band around, 1933, McFall area  
Saw bones & teeth from mammoth from quarry.  
Bronto track holds 30 gals H. O. Measured many times.  
Husb. & he, guides for Chamber of Commerce.  
Many wanted to know specimens.

3-1

Interview at Maria's place 8-19-69 17<sup>20</sup> PM

Mrs. Lewis Howard <sup>(Demi)</sup> Lives nearby. Old friend of Maria's.  
Knows Ryals. Saw mam track Ryals cut out for Dr. Cook.  
Was large, distinct? Quite fair & rough like.  
Cut from McFall area. Can't recall size of border.  
Toes sharp & distinct? Yes. Don't remember for about a mile.  
Saw it many times, at Dr. Cook's at Coburn. Then forgot.

Does this Bandlink track resemble the track (Cook's) in some way?

No, but it may resemble it some.

Which was more distinct & clear? Cook's.

Same length. Can't remember. Large tracks.

3-1

Ryals interview

50<sup>th</sup> anniversary Jan 6, 1969. 7 children, w = Co in  
Borwin County. B.R. has grown a lot in 30 yrs.  
30 yrs ago the town was wild.

People come in covered wagons.

Many flowing wells. — People come & camped.

Moved to Glen Dale in 1928

1st involved in trap in 1931 or so

Depression years. Found sales for trace.  
 dug up a mam track for Dr. Cook (mammoth track?)

looked like my foot. Sharp border? Yes he

Compared to mammoth print. Little deeper to
