

B-2 cont'd. Ryals

#10 foot these kids back in the depression. 3rd  
Worked for 50¢/day + taken in syrup or other.

? money now doesn't mean anything.

Other animal track? Yes,  
How distinct man track & re. tone etc?

Almost as straight as mine.

Looked like a regular man track? It did to me.

But awfully large.

Any normal size tracks? No, all large & long str.

Ever see any like the Charlie Moss series.

I've seen some on the same principle.

Start like starting to run, - 1 or 2 steps in short & far.

Then gets way out yonder. When running only  
trees showed. In 1930's.

New flood brought out new tracks. Then deterioration.

freeze - decay mighty fast.

In 1934 flood got up to house, near present State 1.

- got up to back door. Field under water.

Went back over night. River made bed.

Flood control now.

In below track you find compression rings from  
pressure. Layers of different mud and top layer  
displaced lower layers. Some lines in mud thin  
some hair - width...

Ever see dino & man together? <sup>in same level of rock?</sup> Have seen 1.

right in the other. One stepped in the other.

I've seen 'em step crosswise of dino track.

(Mr. R.) - We took up 1 & the dino & man on the same rock

cut out in 1 piece.

How big a piece?  $4\frac{1}{2}$  - 5 ft.

Note  
issued  
2.56"
