25 yr. huc. Ext. Saw for Tex A + M. Tacahas.
 Indian relics. Tracks interval 15 yrs esp.
 Showed him the Burdick track, 1965, Barlowe, 1944
 your opinion of this rock. Not the type of print that
 he saw being carved. Was an uncutting one
 that had been dug up. Burdick rock definitely
 not the rock that was carved. Stone more yellow.
 carved track, harder limestone. Finishing it +
 pecking it - coffee + vinegar to "age" it.
 No pits around toes. - perfect foot - perfectly made
 not a flaw in it. Almost too perfect. Was an artist.
 Rock hexagonal. Not rounded at all. Thinks it is
 an upland rock, harder than river bed rocks
 Burdick rock cut out of a circle. Family history
 Mims boy 1 yr or 2 older than his son, 1938, track
 picture.

Students fr. Tex A + M for a day's trip into field.
 Spain, India, So. Am. groups came.

4 # esp - Won 2nd drill team, in all Tex.
 2700 people in Somerville Co.

Carrall Hulsey

30 yr. huc, 6 c. Burdick rock inspected.
 "Looks authentic to me". Holes in toes, Bob Gentry
 Has seen carved tracks. - no pits or holes. Looks like
 tracks from a tributary, forgot name of branch,
 1932-1933 taken from branch. Adams made
 square rocks, - no pits. - no obical marks
 around edge. C. Hulsey was told Adams carved
 only 2 human foot prints. but lots of other tracks.
 * Never saw a human track he had made
 His folks say 2 more days.
