

to two ~~very~~ intelligent people, and it would be totally incompatible with their quarrying activities extending over a number of years.

Their track business came to a sudden halt ^{in the late 30's} when they learned that a law had been passed prohibiting the removal of fossil tracks.

~~One track~~ ^{in the early 30's}
 One giant man track they cut out got some real publicity. It was sold to Dr. Cook at nearby Clebourne who mounted it in a low wall by the entrance to his hospital. It was seen by thousands of people coming + going over many years. The ~~high quality~~ ^{high quality} and sharpness of detail is still attested to by people who saw it repeatedly, although the track has long since disappeared. ^{Dr. Cook} Ryals, however, said he couldn't ^{be sure} ~~say~~ it was a man track. He added, with a twinkle in his eye, "it could have been a woman's track". He said it looked just like his foot, only much bigger.

^{Jim} recalled seeing man tracks going crosswise on dinosaur tracks, and she recalled an instance of a man track superimposed on a dinosaur track.

The excavations were carried out on the 715 ~~1st~~ ^{2nd} farm on the south bank of the Paluxy river.
