

3. St. gerards in favor of 'Alps'
 specimens being preserved
1. Check the collection the
 project and was made
 after the pack made
 2. It is now being put
 together
 3. Check marks vertical
 showing of area cut out of
 a block of rock
 a hammered slab the
 bottom is split off as one
 would expect if it worked
 down.
 4. Examination of holes between
 Nos 1 + 2 as usual separate
 up. over.

5. After cleaning plate out
 specimens packed in
 the box over the rock
 looks much less
 attractive as a specimen.
 A team would pick
 a better rock than this.
6. Rock left on top -
 the holes as in
 down. - holes
 this is typical.
