Dear Dr. Dougherty:

In regard to the tracks Dr. Clifford L. Burdick and I studied in the bedrock of the Paluxy River during the summer of 1975, I firmly believe the shape, distribution, size, etc., of these tracks indicate that they are truly man tracks. I believe the Paluxy River tracks described in your book, VALLEY OF THE GIANTS, provide scientific evidence that men and dinosaurs existed contemporaneously. In particular, the track at spot 4 seems very good evidence.

With best regards.

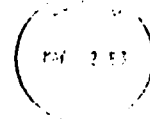

Sincerely,

*Harold S. Slusher*
